

Staff Engineer

Location: Los Angeles, CA

About the Company

Davenport Engineering, Inc., an environmental engineering firm headquartered in Los Angeles, California, provides both specialized consulting and on-site services to the petroleum, chemical manufacturing, food and plastic industries. Our company maintains a reputation for having hands-on, hard working principal and staff engineers, and for developing high performing, well rounded employees. For additional information about the company, please visit our website at www.davenport-co.com.

About the Position

An opening exists for a Staff Engineer in our Los Angeles office location. The position supports a variety of environmental compliance and air emission inventory projects for client facilities located throughout the western United States and gulf coast. Work areas include annual emissions reporting, EPCRA SARA 313 toxic release inventory reporting (multi-media), environmental recordkeeping, compliance monitoring and reporting, greenhouse gas emissions planning and reporting, database development, water discharge reporting, and health risk assessment modeling.

Qualifications

Candidates should have a B.S. in Chemical Engineering or related discipline, and preferably 1-2 years of related experience either through project work or internships. Individuals who are self-motivated, detail oriented, well organized, effective at meeting deadlines, and who thrive in a fast paced team environment are well suited for this position.

Ideal candidates will have graduated or will graduate with a high college GPA, have strong written and verbal communication skills, are critical thinkers, and may have an understanding for the challenges of consulting.

How to Apply

Individuals who meet these specific qualifications should submit an interest letter and resume through jobs@davenport-co.com.
